## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 3-44 are allowed (renumbered as 1-42).
2. The following is an examiner's statement of reasons for allowance: many references in the art disclose a system for identification and monitoring of, and obtaining data including location and status data relating to, comprising a wireless first communicator; at least one wireless interactive second communicator, and wherein a plurality of said first communicators are thereby spaced apart along the access path to the rooms, and within said communication enabling proximity to the access path for communication between said first and second communicators, such as found in Wildman et al. (US 2005/0035862). The prior art of record does not teach or suggest, in the claimed combination, a system for identification and monitoring of, and obtaining data including location and status data relating to, comprising a wireless first communicator; at least one wireless interactive second communicator wherein said second communicator is a wireless tag and wherein each first communicator interacts non-contact wireless communication with said tag so as to obtain unique data, and wherein at least one of room sensors or devices within each room includes means for providing status information to said first communicator, wherein each said first communicator is associated with its own unique room and is adapted to be remotely interrogated by a second communicator communicating with said first communicator so
